**Interactive Complementary Play: Role Reversal**

**Definition:** When playing together, each child can play a different role in the game and then they can switch roles

Reversed roles for running and chasing

Reversed roles for hide-and-seek

**Group experience:**  
 In social play children experience social games where they switch roles (e.g., "Simon Says").  
 In pretend play, they switch make-believe roles (e.g., doctor and patient).

# Peer Talk

## Dr. Rajwan Ben - Shlomo

**Peer talk and social conversation** PPSI© Faculty of Education  
Preschool Peer Social Intervention Bar-Ilan University

Dr. Ofira Rajwan Ben-Shlomo

**EXAMPLE**

When we do things together with our friends we can talk about them and plan our game or activity

**Group experience:** The children play with building blocks, talking about what they want to build and what they have built before.

Strategies that may help: direct request, puppets acting/ modeling/ suggesting what to build, visual cards

# Peer Interaction

## Dr. Dganit Eitan

### Social Interaction Group

Dr. Dganit Eytan

#### Compromise: definition, importance

To compromise means that you accept something slightly different from what you really want, because you are considering the wished of your friend

#### Group experience:

Children are presented with several play options, and they need to reach agreement.

#### Strategies that may help:

Voting; giving up; taking turns with the various options
